Working to Become a Better Partner, Now

MPS is honored to be lifting up our future leaders and moving toward change with you. We are putting systems and practices in place to make our schools kinder, more welcoming and more equitable places to learn.

- We know all students deserve learning experiences that reflect and celebrate what they've experienced in their homes and cultures.
- MPS educators are working hard to reframe how they teach every subject, integrating the world views and life experiences of our students.
- Literacy (reading, writing, speaking) is an especially important focus at MPS. When we approach literacy from this global and cultural perspective, we rightfully honor students' identities and remove barriers to family involvement.
- In fostering an environment of honor and respect, we build school environments where all students and families feel valued, all students belong and learning is a joy.

MPS graduates form the fabric of our city, and we want to ensure all schools, students and families across the district have access to balanced resources. We're excited to work with you to build a stronger MPS Now.

WE ARE MPS NOW

At MPS, we work every day to provide our students an **inclusive education**,
a **supportive community** and **lifelong learning**.

There's a place where everyone belongs in MPS, regardless of what you look like, what language you speak, how you pray or who you love. MPS staff knows more than your name — we know how to help you grow and achieve, wherever you are on your academic journey. We create experiences where you feel challenged and free to explore the world.

Our students break the mold, and we celebrate that.

We are a community of MPS changemakers building a runway for the future, Now.

Inclusive Education

Students succeed when they feel seen and heard.

We believe in well-rounded, supportive and inclusive educational experiences where every student is valued and challenged. Our teachers hold high expectations of students and provide academic opportunities and support to match each unique learning style.

Supportive Community

Education takes a community of support.

We employ nearly 7,000 highly skilled, increasingly diverse professionals districtwide who ensure every student is safe, well-nourished, and prepared for success in careers, college and life as global citizens. We are here to support students to be their best selves.

Lifelong Learning

Communities thrive when we cultivate learning.

We value access to lifelong, affordable, community-based education for all. Our enrichment opportunities are for the whole family to explore and imagine together — from the moment a child is born, through their life's journey with our adult programs.

How to request a school

FOLLOW THESE THREE STEPS TO FIND, REQUEST
AND REGISTER WITH A SCHOOL

ENROLL
NOW

1

Explore your school options

MPS SCHOOL FINDER

Use the School Finder to see which schools are available to you based on your home address.

Web URL

MPS EXPLORE NOW GUIDEBOOK

Review this MPS Explore Now guidebook that has the information you need to explore all MPS schools and program offerings.

View online or pick up a printed copy at our Davis Center office

MPS SCHOOL MATCHMAKER

Try our School Matchmaker to see how your priorities and interests match up with MPS schools.

Web URL

VISIT THE SCHOOLS THAT INTEREST YOU

School open houses take place from November through January.

Many schools also have virtual school open houses and virtual tours. These videos are available for viewing on the MPS YouTube Channel or on school websites.

School tours can be scheduled any time during the school year by contacting schools directly to make arrangements.

2

Request a school

Once you've found the best school option(s) for your child, it's time to submit your request. Web URL [here](#)

3

Register with your school

Once your child has been placed in a school, finish the registration process with your school. Welcome to MPS!

HOW DOES MPS PLACE STUDENTS?

Visit ExploreMPS.org or call 612.668.1840 for placement protocols

MPS seeks equity, transparency, efficiency and convenience in its school placement process. All school placements consider several factors:

- **Integration:** Based on qualification for Educational Benefits
- **Family choice:** The student's attendance area community school or one of our citywide schools
- **Available space/capacity:** Where there is physical space within the building and classroom capacity
- **Placement priorities:**
 1. Geography, where a student lives (community/citywide magnet)
 2. Community school capacity, which is available for students at highly requested community schools to make room for other students (citywide magnet only)
 3. Siblings who are attending the same school at the same time (community/citywide magnet)
 4. Integration, based on how many students are eligible for Educational Benefits in a school (citywide magnet only)
 5. Housing stability, to keep students experiencing homelessness or who are highly mobile in their same school (citywide magnet only)

WHO NEEDS TO REQUEST A SCHOOL?

Students who will turn age 4 by Sept. 1, for High Five (PreKindergarten)

Students who will turn age 5 by Sept. 1, for Kindergarten

Any current student wishing to change to a new school

New students, who are welcomed year-round!

Any current student who wishes to attend a school other than their attendance area community school. (Please note there is limited space in schools outside of a student's attendance area.)

Community

SCHOOLS THAT REFLECT YOUR NEIGHBORHOOD

What to expect from MPS Community Schools

Strong community schools should exemplify the culture and fabric of their surrounding communities. MPS believes teaching and learning materials should connect to students' experiences at home — and school environments should value and honor all students, families and community members. All MPS community schools provide advanced academic programs and learning experiences through STEM (Science, Technology, Engineering and Mathematics). Anyone who lives in the attendance area for a community school is eligible to attend.

Centrally Located

CITYWIDE MAGNET SCHOOLS WITH INNOVATIVE ACADEMIC CURRICULUM

What to expect from MPS Citywide Magnet Schools

Citywide magnet schools welcome students from all neighborhoods across Minneapolis based on their interest in unique academic themes: Arts, STEM (Science, Technology, Engineering and Mathematics), STEAM (Science, Technology, Engineering, Art and Mathematics), Spanish Dual Language, Montessori and Global Studies & Humanities. In addition to a specialized focus, MPS citywide magnet schools immerse students in innovative learning experiences that support career development and encourage community and family involvement. Students must request to attend a citywide magnet school, and placement is made based on a lottery and available space.

GLOBAL STUDIES & HUMANITIES (PreK-8)

MPS Global Studies & Humanities students are invited to critically explore and examine our past, present and future as global citizens. Students are led academically through a social-emotional learning approach that builds empathy in the classroom. Through hands-on participation in service learning, collaborative projects, and student-led discovery, students gain a broader understanding of self, their community and the world.

MONTESSORI (PreK-5)

The MPS Montessori school provides a supportive, calm, caring environment that sparks every child's interests and promotes lifelong learning. Students learn in multi-age classrooms and interact daily with peers at different grade levels to extend their learning. Montessori materials are used to help students learn concepts concretely, which leads them to understanding abstract concepts. All concepts start with seeing the whole to the parts and back to the whole again.

STEM/STEAM (PreK-8)

At MPS STEM/STEAM schools, students learn through project-based learning that uses student interest to address real world events. The projects require students to create solutions using knowledge from multiple subjects. Both the projects and thematic STEM/STEAM programming truly integrate knowledge from all academic subjects. A STEM/STEAM student is invited to work with others, share unique ideas, create new solutions and analyze information. Students are prepared for bright futures and careers through leadership opportunities and dedicated multi-purpose space for hands-on designing, inventing, engineering and robotics that also encourage flexibility and cultural awareness. At the high school level, students can continue STEM learning at their community high school and through participating in districtwide Career and Technical Education programs.

SPANISH DUAL LANGUAGE (PreK-12)

MPS Spanish dual language schools are offered to Spanish- and English-speaking students and speakers of other languages to learn Spanish and English. The goal is for students to emerge fully bilingual and biliterate in English and Spanish, to gain cross-cultural appreciation and to become prepared for a globally interdependent world. In these programs, students begin their experience primarily in Spanish, with more English content added each year. Dual language instruction is one of the most effective ways for English learners to develop their language and academic skills. After 5th grade, students can continue their dual language studies at Andersen United Middle School. At the high school level, students can continue their language studies at their community high school or as part of the Roosevelt Dual Language program.

ARTS (PreK-12)

Students interested in exploring dance, music, theatre and the visual arts will find a home at an MPS arts school. With at least three different arts-based experiences throughout each day, students develop their own unique approach to learning and problem-solving. Students will combine their skills and talents in the arts with core subjects such as English, math, science and social studies, expanding creative exploration and critical thinking opportunities. Family and community involvement in an arts school is key to success, especially as audience members. At the middle school level, students receive an arts experience through STEAM programming.

Hmong Language Pathway Program

The Hmong Language program, for students from the Hmong culture, begins at Hmong International Academy with the goal of students being able to speak, read, write and learn in both Hmong and English. New this year, program continuation at Olson for grades 6-8, followed by Henry (Hmong Heritage and Hmong World Language Courses) for grades 9-12 for students who already speak Hmong.

World-Class Services

THAT SUPPORT A WELL-ROUNDED EDUCATION

College and career opportunities

Whether through advanced academics, earning college credit in high school, or exploring careers, we challenge students to reach their full potential. We offer diverse college and career opportunities to prepare students as global citizens and lifelong learners. Look for a new, state-of-the-art Career and Technical Education Center to break ground at North High School within the next year. Visit ccr.mpls.k12.mn.us or call 612.668.5299 to learn more.

Safe transportation

MPS safely transports to and from school eligible students in grades PreK-8 and those receiving special education services. In high school, we partner with the City of Minneapolis so students can take Metro Transit to school, work and extracurricular activities. That same option is now also available to some middle school students. MPS determines eligibility for transportation based on a number of factors, including where students live, what school they attend, and what services they qualify for. Someone will help you navigate that process during school enrollment. Stay tuned for transportation updates by visiting transportation.mpls.k12.mn.us or call 612.668.2300 to learn more.

Awesome after-school activities

K-12 students can choose from two kinds of after-school programs. After-school enrichment activities are low or no cost, including art, dance, languages, cooking, sports, and technology. After-school academic activities are all free, including Girls in Engineering, Math and Science (GEMS) and Guys in Science and Engineering (GISE). To learn more about enrichment programs, visit youth.mpls.k12.mn.us or call 612.668.3939. To learn more about academic programs, visit alc.mpls.k12.mn.us or call 612.668.0730.

Engaging early childhood education

From birth to kindergarten, students and families who choose MPS can learn and grow together. Early childhood classes help prepare new families for life and school until students are preschool aged. Our PreK programs begin as early as age three and continue until kindergarten, teaching students skills in reading and math while fostering creativity and celebrating play. Students of all abilities are welcomed and supported. [Visit **ece.mpls.k12.mn.us**](https://ece.mpls.k12.mn.us) or call **612.668.3717** to learn more.

Exceptional English Learner (EL) services

EL services in our schools help students learn to listen, speak, read, and write in English. All students with a home language other than English are assessed upon enrollment to determine eligibility. If you are eligible for services, staff will follow up with additional information.

[Visit **multilingual.mpls.k12.mn.us**](https://multilingual.mpls.k12.mn.us) or call **612.668.0174** to learn more.

Supportive Special Education services

We welcome all students with special needs and disabilities and support them through Special Education services. To receive Special Education services, a student must be evaluated and meet state criteria. Eligible students can receive services from birth through age 21 or completion of a secondary education program, and staff will work with families to develop an Individualized Education Plan (IEP) for the student.

[Visit **speced.mpls.k12.mn.us**](https://speced.mpls.k12.mn.us) or call **612.668.5444** to learn more.

Affordable childcare

Minneapolis Kids provides high-quality, fee-based childcare for families where children are encouraged to pursue interests and develop friendships, independence, and confidence. Minneapolis Kids is open to students in PreK/ kindergarten through grade 6 before and/or after school, on non-school days and during the summer at select locations.

[Visit **mplskids.mpls.k12.mn.us**](https://mplskids.mpls.k12.mn.us) or call **612.668.3890** to learn more.
